Portfolio: <https://manishh444.github.io/Portfolio/>

## Skills

HTML & CSS	JAVASCRIPT	EXPRESSJS	NODEJS	NoSQL / SQL
REDIS	DOCKER	AWS	Rest APIs	OOPS

## Experience

<b>Capgemini India</b> Associate consultant	<b>2021-JUNE-08 -Present</b> Bengaluru
--	---

- Developed web applications using the MERN stack, leveraging MongoDB, Express.js, React.js, and Node.js for efficient full-stack development.
- Implemented server-side logic and RESTful APIs using Node.js, ensuring robust backend functionality and seamless data flow.
- Managed relational databases and optimized SQL queries for efficient data retrieval and manipulation, enhancing overall application performance.
- Utilized Docker for containerization, facilitating consistent deployment and scalability across various environments.
- Configured and deployed applications on AWS infrastructure, leveraging services like EC2, S3, and RDS to ensure high availability, scalability, and security.
- Designed and implemented microservices architecture, breaking down complex applications into smaller, independent services to improve modularity, scalability, and maintainability.

<b>Konfinity</b> Intern	<b>2020-NOV-30 - 2021-APR-30</b>
----------------------------	----------------------------------

- Demonstrated proficiency in HTML5, CSS3, and JavaScript, with a focus on creating visually appealing and intuitive user interfaces.
- Back-end Proficiency: Familiarity with server-side technologies like Node.js, Express Able to handle database management using SQL or NoSQL databases.

## Projects

<b>Full Stack Blog Application</b>	<b>JAN- 2024 - PRESENT</b>
------------------------------------	----------------------------

- Developed a full stack blog application from scratch, employing modern web technologies.
- Designed and implemented the frontend using HTML5, CSS3, and JavaScript, ensuring an intuitive and responsive user interface.
- Utilized Node.js for building the backend server, implementing RESTful APIs for handling blog creation, editing, and deletion.
- Integrated MongoDB as the database to store blog content efficiently, ensuring scalability and flexibility.
- Implemented Redis for caching blogs, optimizing performance and reducing response times for frequently accessed content.
- Demonstrated proficiency in both frontend and backend development, as well as database management and caching techniques.

<b>Full Stack MERN Chat Application</b>	<b>JUN-23 -PRESENT</b>
---	------------------------

🔗 <https://github.com/Manishh444/friendly-journey>

- Developed a full stack chat application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented real-time communication using Socket.io, enabling instant messaging between users.
- Ensured security and privacy by encrypting and securely storing user details in MongoDB Database.
- Designed and developed the frontend interface using React.js, providing a seamless user experience.
- Built the backend server using Node.js and Express.js, handling authentication, message routing, and database operations.
- Demonstrated expertise in integrating various technologies to create a feature-rich and secure chat application.

## Education

<b>Visvesvaraya Technological University Bengaluru, Karnataka</b> Electrical and Electronic Engg.	<b>2019</b> B.E
--	--------------------
